About Me

Hi, My name is Ahmet. I'm a web and graphic designer. I've been studying web and graphic applications for the last year and I've improved my skills on Adobe softwares such as Illustrator, After Effects and InDesign.

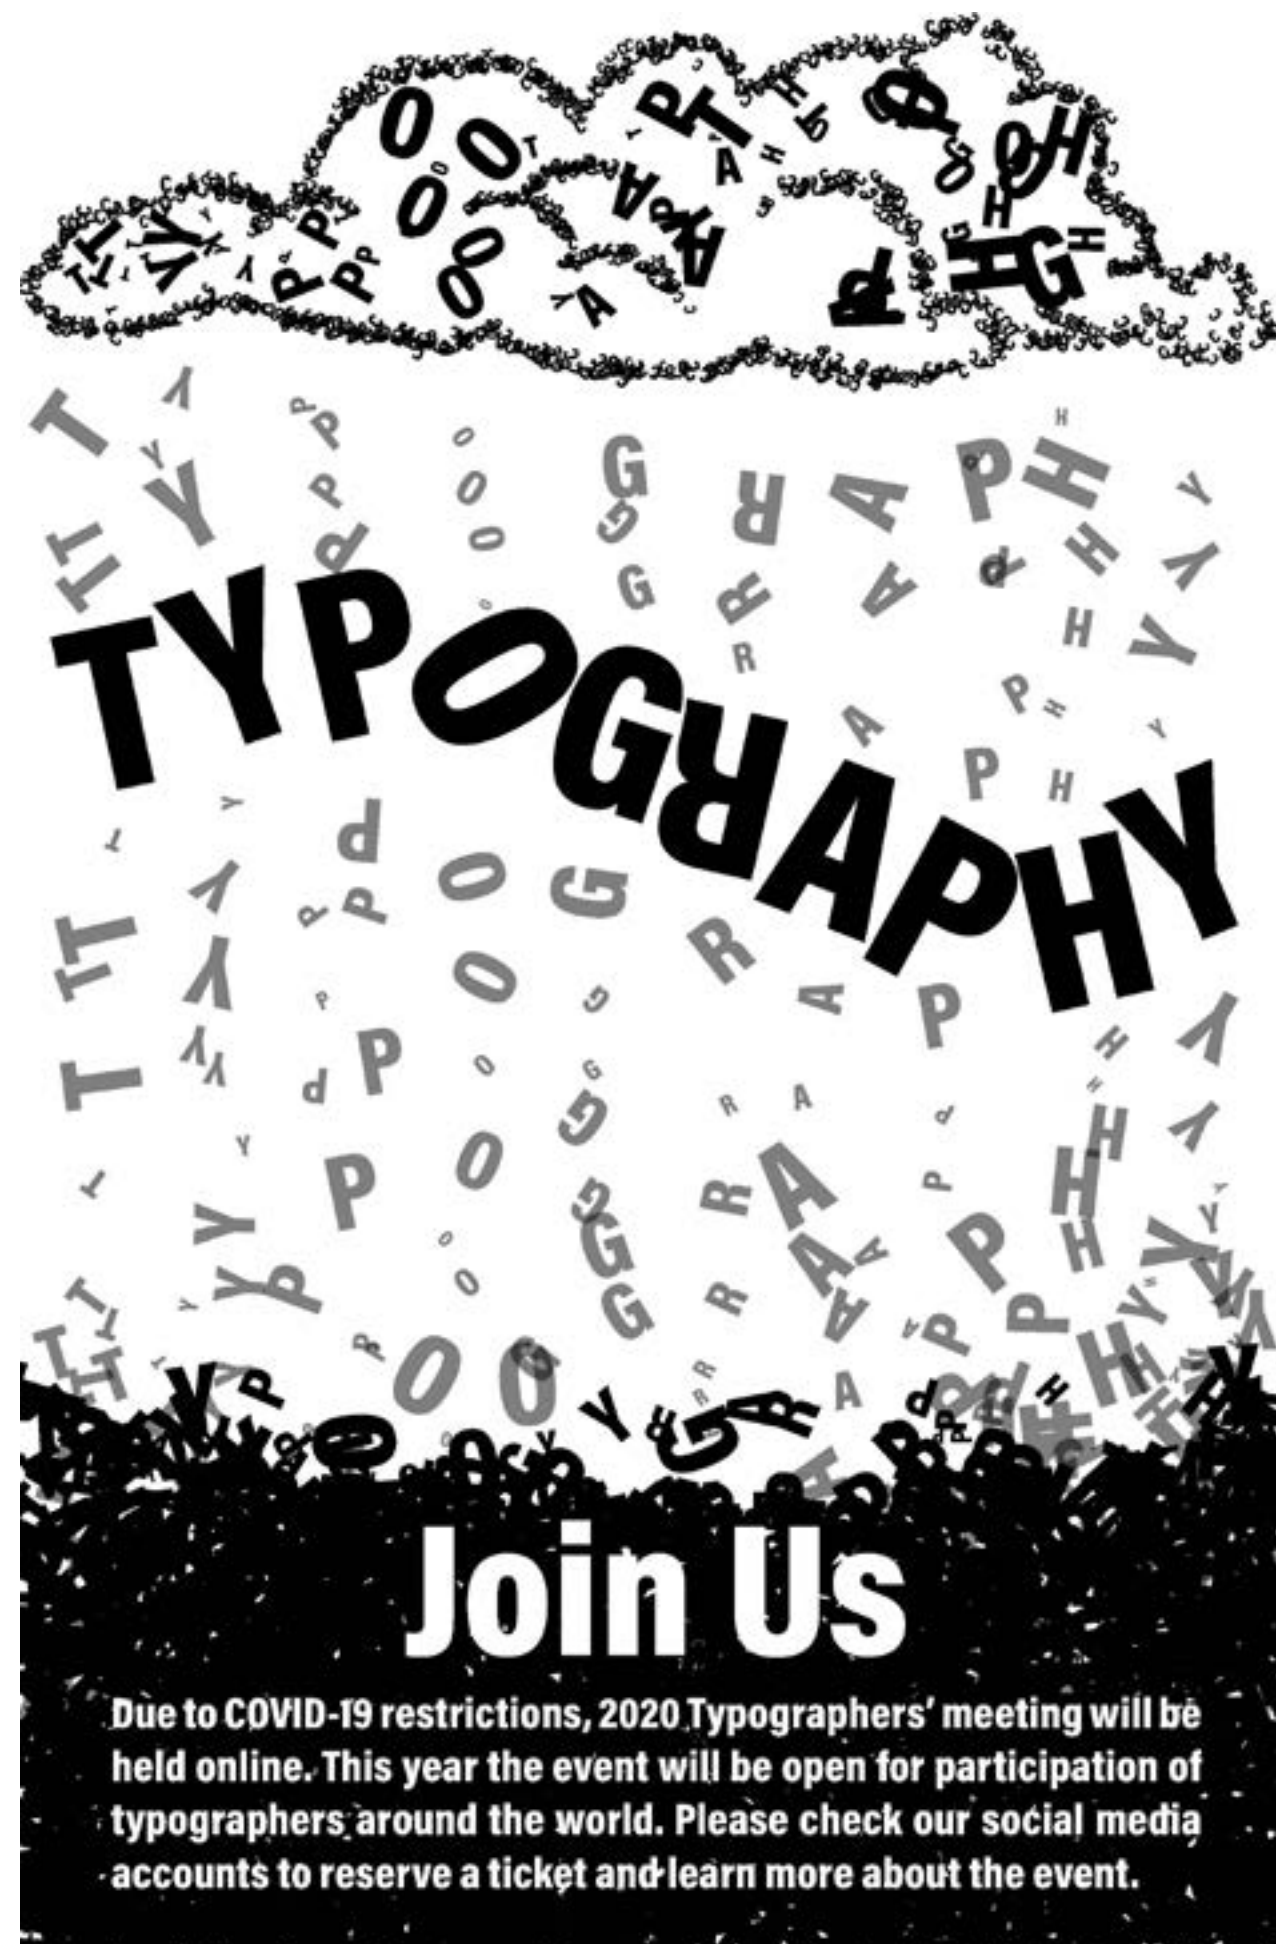

Formerly, I used to work as a Marketing Specialist and I've completed Marketing Research and Business Intelligence program at Algonquin College.

I'm a social person and I can work alone or in teams without having any difficulty. For the last year, I've to work from home which made me better at working away from the office. You may find some examples of my work and my contact information in next pages.
